

BT Redcare Secure

THE SECURE LINK

Security is an important part of running a business. Whether at work or away from your premises, you want to have the peace of mind that your company is safe from threat. BT Redcare protects hundreds of thousands of businesses and homes, but when it comes to security there's no resting on our laurels. We've continued to innovate to achieve and provide the best and most cost-effective protection available. This all means your premises are covered and secure wherever you might be.

Our BT Redcare Secure portfolio enables you to select between three security variants to meet your business demands. Depending on your business risk and the technology you use you can opt for Secure 2, Secure 3 or Secure IP.

BT Redcare Secure

THE BENEFITS EXPLAINED

24/7 support

A team of skilled BT Redcare technicians is on hand 24 hours a day, 365 days a year, so you can always rely on our total support.

3 in 1

There are three great product variants to the new BT Redcare Secure range, but we won't tie you down to just one. Whether you choose Secure 2, Secure 3 or Secure IP you will be able to move between all three options should your business need to.

21CN compliant

BT Redcare Secure is a suite of security solutions that looks to the future, not to the past. They meet the highest industry security requirements (ACPO and British/European standards) and as with all Redcare products, the new portfolio is 21st Century Network compliant meaning your product will continue to work in the 21CN environment.

No call charges/hidden costs

When it comes to cost, we think it's important that what you see is what you get. We have made a point of having no call charges – pretty significant when you think it could save you between £30 – £50 a year on your phone bill.

Future proofed

By choosing a BT Redcare Secure solution you will be securing your business for the future, as well as the present. Should your business risk or future technology change, your Secure solution can be adapted to meet your new requirements.

Value for money

A feature-rich security solution that gives you peace of mind at a price that won't break the bank.

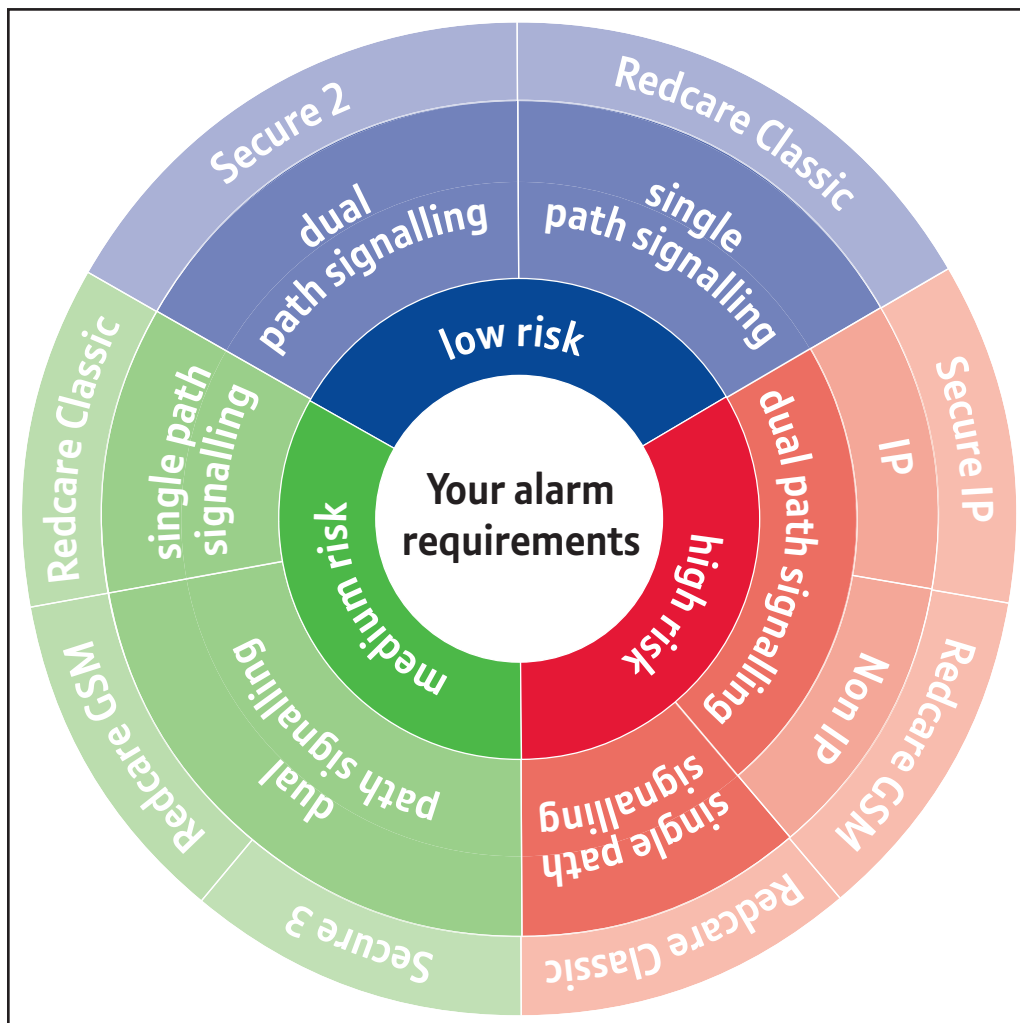

Dual signalling

BT Redcare's dual signaling approach allows a 'confirmed activation' to be sent to your Alarm Receiving Centre, even if your telephone line has been attacked.

WHICH PRODUCT OPTION IS BEST FOR ME?

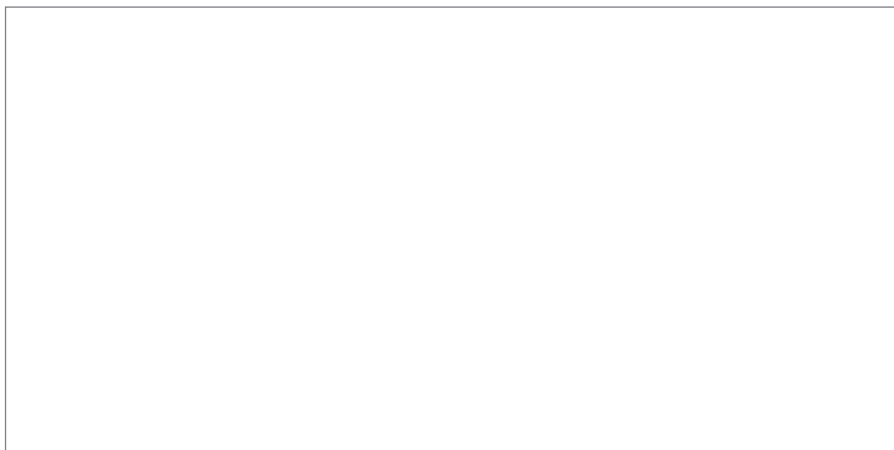

BT Redcare has a range of products to suit your exact security needs including Secure 2, Secure 3 and Secure IP. Use the diagram below to ensure you select the correct product for your business.

ABOUT BT Redcare

Keeping businesses secure is our business. BT Redcare protects hundreds of thousands of businesses and homes and is a leading provider of secure signalling in the UK. We may operate UK wide, but we're regionally-based meaning our dedicated field engineers are always on hand for on-site support. Add to this our 24-hour manned network control and you can rest assured your business is in safe hands.
